

In this unit, you will study both 1 and 2 point perspective drawing, in order to understand how three dimensional objects are placed on a picture plane.

You will also study water colour painting techniques.

You will then merge these areas in a studio project of a building painted in watercolours.

TASKS:	DUE:
1. Perspective PowerPoint (looked at in class) 1 point, 2 point and atmospheric perspective.	
2. 1 point perspective drawing of two buildings, with doors and windows on side wall.	
3. 1 point perspective quiz (assessment)	
4. 2 point perspective drawing with doors and windows on several stories on either side of the structure.	
5. 2 point perspective drawing in your sketchbook of three buildings. Include windows and doors on the sides. This drawing should be detailed. You may include sidewalks, streets, trees, etc. Have fun!	
6. 2 point perspective quiz (evaluation)	
7. Water colour techniques handout (in class)	
8. Water colour study of an animal (in class). Implement the new techniques!	
7. Drawing of a house from a photo/picture on newsprint. The structure should have personal meaning to you. Isolate the horizon line, vanishing point(s). Be accurate!	
8. Creation: Draw, in light pencil, your chosen building on a sheet of water colour paper. Tape your sheet to a board. Make sure that you are creating even borders. Begin painting by giving your surface a wash (flat or 2 colour merge). Slowly build up your colours. When finished, let dry. Pencil line should be erased. You may choose to go over some of the contour lines with a fine tipped black marker.	November 26
